About SHI

SHI (Stop Hospital-acquired Infections): Your Trusted Partner in Quality Pre-Sterilised Single Use Gowns, Drapes, and Drapes Sets

At SHI, our journey began with a mission inspired by a report published in the **British Medical Journal**, which revealed that **30% of deaths** in **UK hospitals** were caused by **hospital-acquired infections**. This alarming statistic propelled us to take action and address this menace in Indian hospitals. We embarked on an endeavour to reduce the risk of hospital-acquired infections by advocating for the use of single-use pre-sterilised garments.

To spread awareness and promote our cause, we conducted seminars in various hospitals across the country. We even had the privilege of hosting **Mr. Tim Galakop**, an international authority on the subject, as a speaker at these seminars. His expertise and insights greatly contributed to our understanding of the issue and strengthened our resolve to combat it effectively.

During our journey, we had the opportunity to visit **AHLSTROM's** factory in the **USA**. **AHLSTROM**, a renowned manufacturer, was producing **Level 4 fabric**—an advanced material that offers superior protection against contaminants. Recognizing the immense value of this fabric in our fight against hospital-acquired infections, we decided to procure a substantial quantity of **BVB fabric**, specifically designed for creating Level 4 gowns.

With the Level 4 fabric in hand, we commenced our manufacturing process, ensuring stringent quality checks at every stage. Our commitment to excellence led us to obtain the **ISO 13485 certification**, a testament to our dedication to adhering to rigorous international standards for medical device manufacturing. This certification highlights our unwavering commitment to maintaining the highest levels of product quality and safety.

At SHI, our slogan, "Stop Hospital-acquired Infections" encapsulates our mission and drives our passion for creating a safer healthcare environment. We understand the critical importance of infection prevention and have meticulously designed our products to provide superior protection and comfort to healthcare professionals and patients alike.

Through advanced sterilisation techniques such as Gamma Irradiation and Ethylene Oxide (ETO), we ensure that our products are thoroughly sterilised, guaranteeing the highest level of safety and efficacy.

As pioneers in our field, we continuously invest in research and development to drive innovation and stay at the forefront of emerging trends. Our dedicated and highly skilled workforce undergoes ongoing educational and training programs, further enhancing their expertise.

We are grateful for the trust and support of our valued customers, who have embraced our products as an integral part of their infection prevention strategies. Together, let us forge a path towards a safer and healthier healthcare environment, where the risk of hospital-acquired infections is minimized, and patient outcomes are optimized.

Choose SHI for unparalleled quality, reliability, and peace of mind. Together, we can make a difference in patient care and safety.

Fabric Matter: Elevate Your Surgical Practice with the Right Gown Fabrics

We believe that the choice of fabrics plays a crucial role in creating surgical gowns that offer exceptional protection, comfort, and durability.

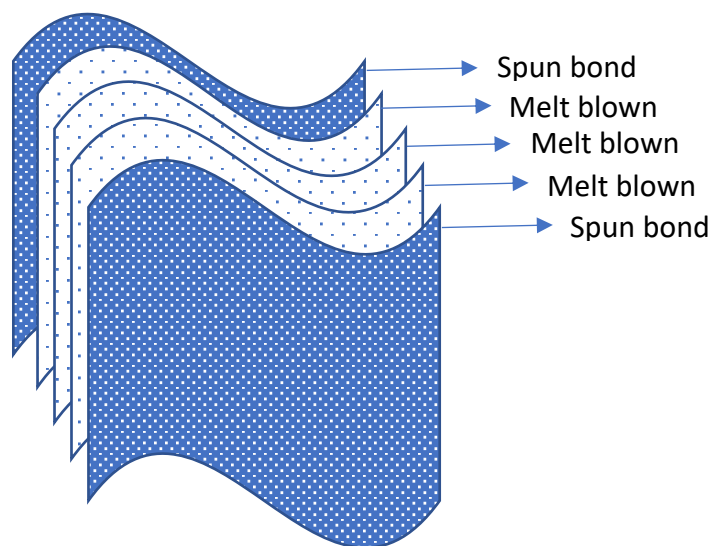

SSMMS Fabric

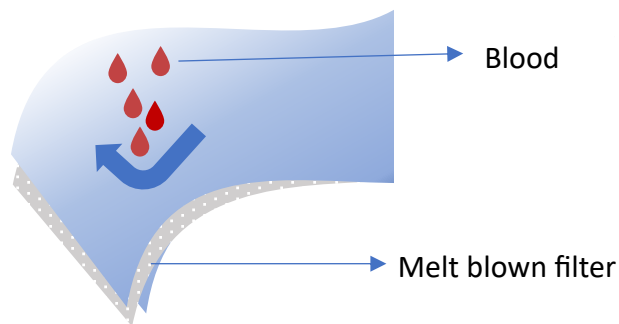

SSMMS (3 beams of Spun bond and 2 beams of Melt blown) or simply SMS Nonwovens is a 5 layered 100% Polypropylene nonwoven fabric manufactured using 5 beams. This fabric offers amazing benefits like fine filtration, low pressure drop, acoustic insulation and decent strength and elongation.

SMMMS Fabric

SMMMS is a composite fabric consisting of four layers: two layers of spun bond polypropylene sandwiched between two layers of melt blown polypropylene.

SMMMS fabric offers enhanced barrier properties and exceptional fluid repellency. Its multi-layer construction provides superior protection against liquid-borne pathogens while maintaining breathability and flexibility for healthcare professionals.

ARAS Fabric

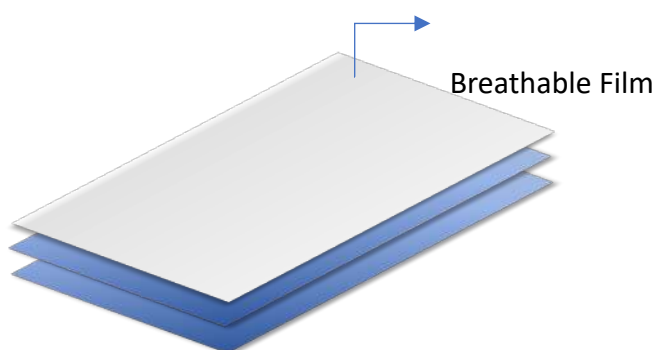

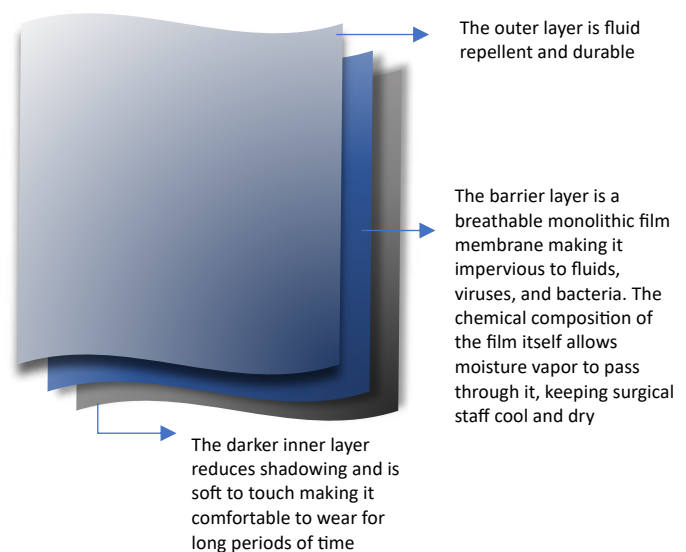

Anti-static alcohol repellent fabric is specially designed to resist the absorption of alcohols and antistatic solutions commonly used in medical environments.

This fabric offers a high level of fluid repellency and prevents the build-up of static charges, reducing the risk of electrical discharge. It ensures the gown's integrity and minimizes the attraction of contaminants, maintaining a sterile environment.

BVB Fabric

BVB (Breathable Viral Barrier) fabric combines a microporous film with a nonwoven substrate, providing a barrier against liquid penetration while allowing moisture vapor transmission.

BVB fabric offers a high level of protection against liquids, including blood and bodily fluids, while allowing heat and moisture to escape, reducing the risk of heat stress. It provides a comfortable and breathable gown option for extended surgical procedures.

Breathable Laminated Fabric

Our breathable film laminated fabrics consist of a thin breathable film layer bonded to a nonwoven substrate, offering a unique combination of fluid resistance and breathability.

These fabrics provide excellent barrier properties, protecting against liquids and preventing the transfer of microorganisms. The breathable film allows for efficient moisture vapor transmission, promoting comfort and reducing the risk of heat build-up.

AAMI Level Guide

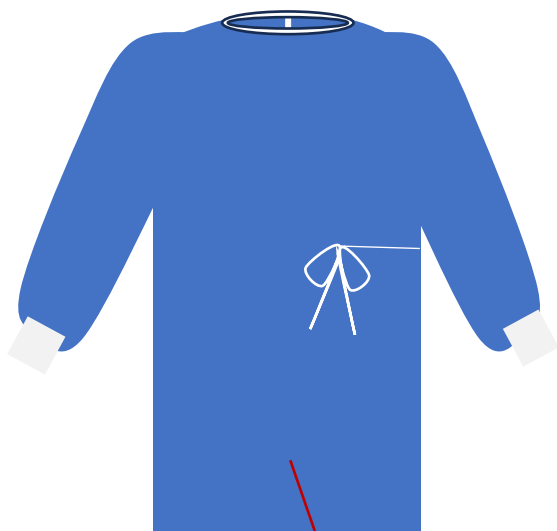

Navigating the Standards of Surgical Gown Protection

Level 1

- Provides the lowest level of protection
- Designed for use during basic care, such as routine blood draws and exams
- AATCC 42 water resistance test
- **Spun bond, SMS Fabrics**

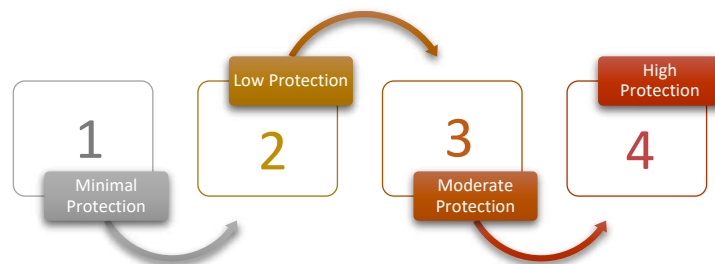

Level 2

- Provides the higher level of protection than level 1
- Suitable for low-risk procedures, such as simple surgeries, minor orthopedic procedures, and routine patient care.
- AATCC 42 and AATCC 127 synthetic blood penetration test
- **SSMMS, SMMMS Fabrics**

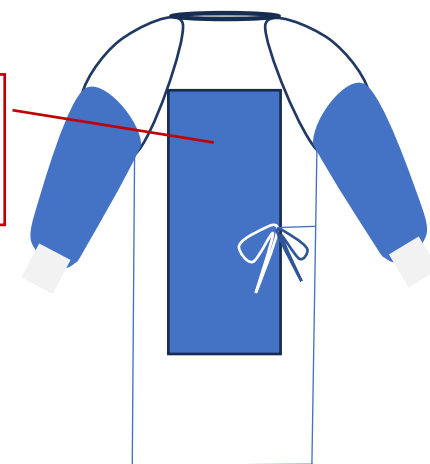

Breathable Film Laminated
(AAMI Level 4)

AAMI Protection Level

Reinforced Critical Area
(AAMI Level 3)

Level 3

- Offers a higher level of protection and barrier properties.
- Suitable for moderate-risk procedures, including open-heart surgery, gastrointestinal procedures, and orthopedic surgeries.
- AATCC 42 and AATCC 127 with increased pressure
- **SSMMS, SMMMS with Poly Reinforced Fabrics**

Level 4

- Provides the highest level of protection against liquid penetration.
- Suitable for high-risk procedures involving heavy fluid exposure, such as long-duration orthopedic surgeries, trauma cases, and procedures with high-pressure irrigation.
- ASTM F1670 synthetic blood penetration test and ASTM F1671 viral penetration test
- **BVB, Breathable Laminated Fabrics**

AAMI established standard ANSI/AAMI PB70:2012 for protective apparel, including surgical gowns, outlining the testing requirements for the four different AAMI levels.

Surgical Gowns

Discover Excellence in Surgical Gowns: Unveiling Our High-Quality Collection

A **surgical gown** is a personal protective garment intended to be worn by health care personnel during surgical procedures to protect both the patient and health care personnel from the transfer of microorganisms, body fluids, and particulate matter.

Our sterile disposable gowns are made from various fabrics like **SSMMS**, **SMMMS**, **BVB**, and **Anti-Static Alcohol Repellent**, and are designed with **two hand towels** and a variety of sizes, with chest and arms reinforced to provide extra protection.

Our gowns pass **AAMI PB70:2022 (PB70)** standards and are ultrasonically stitched for maximum durability and safety.

As a testament to our commitment to quality, we verify our major process as per ISO standard and have obtained **ISO 13485:2016** certification, an internationally recognized standard for quality management systems specific to medical devices.

With our high-quality sterile disposable gowns, healthcare workers and patients can rest assured that they are receiving products of the highest standard that adhere to the strictest safety protocols.

Surgical Drapes & Packs

Introducing the Ultimate Catalog of Surgical Drapes & Packs

Discover the comprehensive range of surgical drapes and packs meticulously designed to meet the dynamic needs of operating rooms worldwide. At SHI, we are proud to present our extensive catalogue, showcasing a diverse collection of high-quality and reliable products that elevate surgical procedures to new heights of excellence.

Unparalleled Protection, Unmatched Precision

Our surgical drapes and packs are thoughtfully crafted with the utmost precision and attention to detail, ensuring a sterile surgical environment and optimizing patient safety. With our commitment to using skin-friendly adhesive, your patients' comfort is prioritized while maintaining secure and reliable attachment during procedures.

Premium Features for Superior Performance

Our commitment to excellence extends to the materials and features we incorporate into our surgical drapes and packs. We utilize highly absorbent reinforcement materials to enhance fluid management and promote a dry surgical field, ensuring optimal visibility and control for surgeons.

Tailored Solutions for Your Surgical Procedures

Whether you require specific dimensions, fenestrations, reinforcement areas, or other specialized features, our team is dedicated to collaborating with you to create custom surgical drapes and drape packs. We work closely with healthcare professionals to understand their specific requirements and provide tailored solutions that optimize surgical efficiency and patient care.

Compliant with International Standards

At SHI, we adhere to the highest industry standards. All our manufacturing processes and quality management systems are in strict compliance with ISO 13485:2016, ensuring that our products meet the stringent requirements of the medical industry. This certification reflects our commitment to consistently delivering safe and effective surgical drapes and packs.

Uncompromising Barrier Protection

Ensuring the integrity of our products is of utmost importance to us. Each surgical drape and pack is carefully packaged in a medical-grade peel pouch, providing protection against contamination and maintaining sterility until the point of use. Our use of Tyvek material in the packaging further enhances the barrier properties, safeguarding the quality of the products.

Empowering Intensive Care, Enriching Lives

Blanket

- ❑ Super soft fabric
- ❑ Available in various sizes
- ❑ Available in multi color

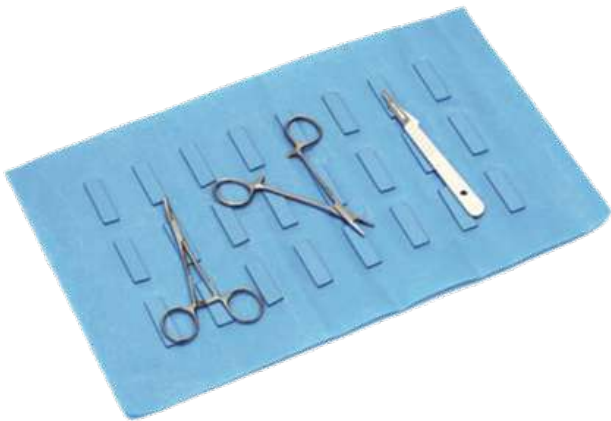

Sponge Sticks

- ❑ Wide variety of sponge sticks
- ❑ Ultrasonic welding used to adhere foam to the stick
- ❑ Available in multiple lengths
- ❑ Absorbent foam available in multiple colors, shapes, and sizes
- ❑ Does not contain natural rubber latex, nano- silver additives or phthalates

Sponge Forceps

- ❑ Used to hold sponges during preparation or fluid collection
- ❑ Available in multiple lengths and styles
- ❑ Does not contain natural rubber latex, nano-silver additives or phthalates

Magnetic Instrument Pad Magnetic

- ❑ Encourages safe sharps' passing practices, helping to reduce accidental sharps injuries
- ❑ Powerful raised magnets securely hold instruments in place
- ❑ Non-slip foam backing for enhanced safety
- ❑ Flexible design conforms to shape of patient's body
- ❑ Does not contain natural rubber latex, nano- silver additives or phthalates

Non-Slip Instrument Pad

- ❑ Cost-effective solution for hands-free transfer
- ❑ Non-slip surface helps keep instruments in place while also holding securely to the patient drape
- ❑ Encourages safe sharps passing practices, helping to reduce accidental sharps injuries
- ❑ Does not contain natural rubber latex, nano- silver additives or phthalates

Sharp Pad

- ❑ Resistant to needle and blade rupture
- ❑ Strong adhesive pad
- ❑ Does not contain natural rubber latex, nano- silver additives or phthalates

Sharp Transfer Tray

- ❑ Facilitates the safe transfer of scalpels, syringes, needles and other sharp instruments, eliminating the need for hand-to-hand passing
- ❑ Assists in reducing provider sharps injuries
- ❑ Helps to safely contain and protect delicate instruments when not in use
- ❑ Can be used with a number of sharp instruments, including but not limited to scalpels, syringes, Veress needles, K wires, trocars
- ❑ Not made with natural rubber latex or phthalates

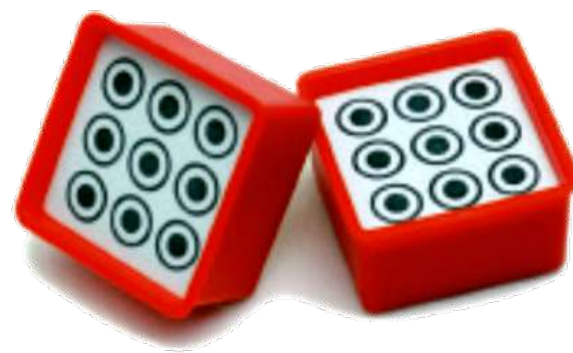

Scalpel Holder

- ❑ Accommodates up to 3 scalpels
- ❑ Scalpels maintained in "blade-down" position
- ❑ Adhesive tab allows for secure placement on back table cover or mayo stand
- ❑ Does not contain natural rubber latex, nano- silver additives or phthalates

Temporary Sharp Holder

- Prevents accidental sharps injuries
- Adhesive backing allows for secure placement on any work surface
- Foam block with durable plastic housing
- Does not contain natural rubber latex, nano- silver additives or phthalates

Diathermy Instrument Pouch

- Three sizes available to meet your needs: 1 pocket, 2 pockets, or 3 pockets
- Reliable adhesive edge for secure placement
- Does not contain natural rubber latex, nano-silver additives or phthalates

Tube Holder/Cord Holder

- Organizes and securely holds tubes and cords in place
- Removable hook-and-loop strap allows for added flexibility
- Adhesive backing fastens easily to drapes
- Does not contain natural rubber latex, nano-silver additives or phthalates

Anti-Fog Solution

- Safe and effective fog prevention
- Inbuilt Spray Functionality
- 5 ml & 10 ml Pack

Towel Clamp

- Secure surgical cords, drapes and tubes
- Easy release tab for repositioning
- Teeth serrations for added grip
- Does not contain natural rubber latex, nano- silver additives or phthalates

Light Handle Cover

- Flexible
- Reduces cost of reprocessing and sterilizing
- Pushes onto light handle adapter
- Does not contain natural rubber latex, nano- silver additives or phthalates

Mucus Sucker

- ❑ Ideal for safely irrigating smaller wounds and secretions
- ❑ Available in 2oz (60ml) or 3oz (89ml)
- ❑ Does not contain natural rubber latex, nano-silver additives or phthalates

Disposable Towel

- ❑ Highly Absorbent
- ❑ Various Sizes Available
- ❑ Customizable Sizes

Plastic Tray

- ❑ Various Sizes
- ❑ Various Colors
- ❑ Various Designs

Disposable Bag

- ❑ Various sizes available
- ❑ Disposable
- ❑ Bio-degradable

Eye Mask

- ❑ Allergy-free, ultra-soft cotton material
- ❑ Suitable for single-use
- ❑ Available in various colors

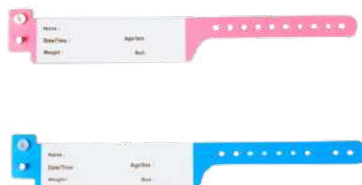

Impervious Stockinette

- ❑ Internal woven material for comfort
- ❑ External plastic material that provides an impervious barrier
- ❑ Available with or without pull tabs and in four sizes to ensure a good fit
- ❑ Does not contain natural rubber latex, nano- silver additives or phthalate

Cord Clamp

- ☐ Sterile
- ☐ Single Use
- ☐ Safe and Convenient Lock

Mother & Baby Band
